Projects

Casts (React)

- an online music player UI which has a list of music you can choose and play from. A toggle in the footer also allows for theme change.
- https://lnkd.in/eUsG6y8

Code Clan Front End (React)

- User Interface with different pages including sign up and login pages, built with Material UI, etc.

Simula (React Native)

- A simulation between any two premier league teams.
- Computer makes major decisions. Commentaries are shown as match is ongoing. Goals scored including the minute the goal was scored as well as who scored is shown.
- Project: https://github.com/naries/Simula

Sales Page (React)

- https://60222933461e7468aa1e5f30--workingonpage.netlify.app/

Resume Summarization System (Python, Anaconda)

- Machine learning, a AI system that lists out the skills in a resume. Built with python and Anaconda with libraries including scikit learn.

Student Timetable (React)

- Timetable selector for students. Not your usual kind of time table, (i promise). A page that shows what courses are to be offered based on the user selection.

WordBox (React)

- https://github.com/naries/WordBoxNG
- A UI where users can write poems or stories, get feedbacks and comments.
